

How does CCTV handle the photovoltaic panel scam

How does a solar installation scam work?

How the scam works: People posing as solar installers or utility employees call or come to your home and offer free solar panels through made-up government programs or incentives. Sometimes they also claim their company will cover the cost of installation by providing huge rebates.

How do I avoid solar panel scams?

Getting multiple quotes and thoroughly vetting installers is the best way to avoid solar panel scams. You can also use solar.com to compare quotes from our network of thoroughly vetted installers.

Are solar panels a scam?

With that demand comes fierce competition within the solar panel market. Scams, schemes and straight-up fraud abound in the dark underbelly of an otherwise light-filled industry. While there are still many honest and reliable solar panel companies on the market, it can be hard to differentiate the good guys from the rest.

Are solar companies a bait and switch scam?

This is essentially a classic bait and switch scam. A solar company uses the premise of getting 30% off solar to get homeowners to sign a lease or PPA, and then collects it for themselves. In extreme cases, solar scammers may even pose as utility or government officials trying to promote a new or unique solar program in your area.

Is residential solar a scam?

When done right, going solar can substantially reduce your carbon footprint and your energy costs. However, this rare double-whammy of benefits also makes the residential solar industry ripe for scams.

Are solar leases and PPAs a scam?

No, not all leases and PPAs are scams. However, they seem to be a breeding ground for deceptive and predatory practices, including the old "government is paying people to go solar" scam. Related reading: Solar Leases vs. Solar Loans vs. Solar PPAs
