

How long can LONGi photovoltaic panels be used

How long do LONGi Solar panels last?

So, LONGi's solar panels suffer less damage and last longer. Most panels use Boron-doped P-type silicon wafers, and these degrade faster, with 83% power retention after 25 years. LONGi's solar panels lose only about 2% of their initial power rating in the first year and under 0.55% per year after that.

Do LONGi Solar panels lose power?

LONGi's solar panels lose only about 2% of their initial power rating in the first year and under 0.55% per year after that. Their solar panels keep about 85% of their original power over a 30-year period.

Are LONGi Solar panels good value based?

Longi Solar offers value based solar panels that come with high efficiency standards, and above average 25 year performance output. In comparison to other value based panels, they come below the average price point with similar efficiency ratings. The same is true when Longi's modules are compared to mid-range panels.

How does LONGi Solar work?

LONGi Solar uses Gallium-doped silicon, which improves panel stability and reduces light-induced degradation (LID) -- or how solar panel efficiency decreases after sunlight exposure. So, LONGi's solar panels suffer less damage and last longer.

What kind of solar panels does Longi offer?

In its Hi-MO 4, LONGi offers 60 and 72 half-cut solar panels and all-black solar panels with high output power ratings from 355W to 460W. Panels in this series are offered with residential installations in mind. They are also suited in mountainous regions and areas where handling modules can be difficult.

Does LONGi Solar have a warranty?

LONGi Solar has a much longer power warranty, extending for 25 or 30 years, depending on the solar panel model. The extended power warranty ensures that the panels maintain a guaranteed level of power output over the designated period, aligning with industry standards and offering long-term performance assurance to customers.
