

How to deal with stubborn stains on photovoltaic panels

How to make solar panels bright and shiny again?

Some run on tracks or use smart mapping to clean solar panels using a spinning microfiber cloth. So far, we have introduced 3 different ways to make your solar panels bright and shiny again; professional cleaning services, automated solar panel cleaning system, or by yourself.

How do I know if my solar panels need a cleaning?

A drop in energy output can be an indication that your solar panels could use a cleaning. The mySunPower® app gives you complete control over your SunPower solar power system, allowing you to track and monitor your energy production in real-time. With SunPower, you'll always know exactly how well your panels are performing.

Should you clean solar panels without feet firmly planted?

Never clean solar panels without your feet firmly planted on a stable surface. While cleaning, it's crucial to avoid damaging any electrical components, as this could make the solar panels less effective or disrupt their operation altogether. Always weigh the safety risks and benefits before cleaning your solar panels.

Should you de-grime your solar panels?

De-griming your solar panels can improve their overall efficiency. A study by the National Renewable Energy Laboratory (NREL) outlines that the U.S. loses up to 7% of its power through "soiled" or dirty solar panels each year. Maintaining your solar panels allows them to harness more sunlight, generate more solar energy, and save you more money.

How do you clean a portable solar panel?

Wash or wipe a portable solar panel with water or a damp cloth just like rigid panels. If you've been on a particularly muddy camping trip, or you're using larger panels for home backup, you might need to give them a rinse. EcoFlow portable solar panels have an IP67 waterproof rating. Easily clean them with a slow stream of water when necessary.

Do solar panels need to be turned off before cleaning?

Solar panels are electrical equipment, and it's essential to turn them off before cleaning. This ensures that there's no active current while you're working on them. Plan Your Cleaning Schedule: It's best to clean your solar panels during cooler parts of the day, like early morning or late afternoon.
