

Southern Power Grid Photovoltaic Panel Tender Announcement

Does Southern Power own a solar power plant?

Southern Power currently owns or operates more than 2,395 megawatts of solar generating capacity at 28 facilities operating in California, Georgia, Nevada, New Mexico, North Carolina and Texas. Twenty-six of these facilities are co-owned by third parties, with Southern Power having the majority ownership.

What is a solar power purchase agreement (PPA)?

A solar power purchase agreement (PPA) is a financial contract in which a third-party developer owns, operates, and maintains the photovoltaic system, and a customer agrees to purchase the system's electric output from the solar services provider for an agreed-upon price and for a predetermined period.

How many megawatts does Southern Power own?

Southern Power currently owns or operates more than 2,533 megawatts of wind generating capacity at 15 facilities operating or under construction. Southern Power owns more than 7,380 megawatts across seven gas plants in Alabama, Georgia and North Carolina.
