

# Why don't you install photovoltaic panels in your home

Should you put solar panels on your home?

Get all the information before you decide to put them on your home. Solar panels have a lot of benefits, but there are downsides too. Getting your home set up with solar panels is easier and cheaper now than it's ever been.

Are solar panels right for You?

Solar panels are best for people who live in good solar states with solar-friendly policies, like net metering and solar incentive programs. Homes with south-facing roofs and lots of unshaded space are also ideal for solar. Homeowners with high electricity bills are among those who can benefit the most from going solar.

Do solar panels add value to your home?

While it's true that solar panels add value to your home, that's only true if the solar is fully paid for. Signing up for a solar lease or PPA can make it more challenging to sell your home, and a solar loan will likely need to be paid off in escrow as a condition of the home sale.

Can you install solar panels on a roof?

However, you will need solar batteries to store excess energy to use at night and when it's overcast. You can install solar panels on the ground, but are more expensive to install and require additional space. Consult a reputable solar panel installer to confirm whether your roof is compatible with solar panels.

Can solar panels be installed on the ground?

You can install solar panels on the ground, but are more expensive to install and require additional space. Consult a reputable solar panel installer to confirm whether your roof is compatible with solar panels. You'll see the best return on investment if you install solar panels on a home you plan to stay in for a while.

Where can solar panels be installed?

The roof of your home is the most common site for solar panels -- but it's not the only place they can go. Homeowners who can't get rooftop solar panels can get creative and find another site. Solar panels can be installed on a carport, gazebo, or pergola.
