Could a solar power plant be set up in Himachal Pradesh?

But Himachal Pradesh, a hilly state in northern India where snow and sun abound, is about to break new ground. The state plans to set up a one-gigawatt solar power plant in the Spiti Valley, an area that typically sees more than 300 clear and sunny days in a year but remains snowbound for up to a third of the year.

Can a roof-mounted PV system cause a lightning strike?

Note: It is generally accepted that the installation of a typical roof-mounted PV system presents a very small increased risk of a direct lightning strike.

Is mechanical design of a PV array within the scope of this document?

Mechanical design of the PV array is not within the scope of this document. BRE digest 489 'Wind loads on roof-based Photovoltaic systems', and BRE Digest 495 'Mechanical Installation of roof-mounted Photovoltaic systems', give guidance in this area.

Can PME Earth be taken outside the equipotential zone?

Where the incoming supply is PME (the majority of domestic supply arrangements), the PME earth cannot be taken outside the equipotential zone. This is to prevent the potential shock hazard should the supply neutral ever be lost. The bonding to earth of any of the current carrying d.c. conductors is not recommended.
